Tel: 020-7738 8866 Fax: 020-7498 9075

Anthony de Grey has been active in the gardening world since 1974 and is a five times Chelsea Flower Show Award winner. He is hugely knowledgeable and widely respected throughout horticultural circles. He has worked with a wide range of clients and his extensive experience in Landscaping has led to commissions from the smallest London patio to acres abroad. In 1989, realising there was a need for, and lack of, well-designed Trellis in the area of garden design, he set up Anthony de Grey Trellises, now one of the leading Companies in its field. Therefore the business now brings together under one distinguished name two distinctly separate yet complementary services.

Anthony de Grey Gardens

Beautiful gardens do not just happen - they require careful planning and construction as well as maintenance to keep them looking good. Whether you want a new garden, a complete renovation or just a few window-boxes, Anthony de Grey Gardens has all the expertise you need.

Anthony de Grey Trellises

Trellis can be traced back to before Roman times. It has been used throughout the ages for practical and ornamental purposes and provides structure and year-round interest in gardens of all sizes. Anthony de Grey Trellises continues this tradition and trellises are available in a huge variety of shapes, sizes and colours to suit all tastes.

Anthony de Grey Gardens has been designing, building and maintaining gardens within the M25 since 1974.

Anthony de Grey Trellises designs, manufactures and markets a wide range of trellises and trellis derived garden structures.

Garden Landscaping

The garden is the focal point of every fine home or building, and whether it be a London rooftop, office building or rolling rural retreat, Anthony de Grey Gardens brings a wealth of innovative design and over 25 years of expertise to every commission. We are a company devoted to landscaping and garden renovation, especially within London and M25 area, so, naturally, we are sensitive to the vast differences in size and scale imposed by small and large gardens. We understand how good design and planting will transform your garden into an integral part of your home or workplace, giving year-round pleasure.

Anthony de Grey's enthusiastic team of garden designers and constructors provide sound advice and knowledge - leaving you to delight in the garden you always wanted. We also carry out many projects for offices of all types, bearing in mind that a beautiful garden creates a sympathetic and successful environment in which to work. This is equally true for commercial properties, where thoughtful landscaping is a vital element.

Consequently Anthony de Grey Gardens works closely with owners, architects, interior designers and developers on house and flat conversions, and retail and industrial schemes. Additionally we manufacture, supply and erect our own distinctive range of Anthony de Grey Trellises. The Range combines trellis, with columns, arbours, gazebos and pergolas - infinite possibilities in a variety of finishes and patterns.

We know how vital planting is, using sympathetic hues, balanced colour, contrasting foliage, texture and height - equally, structure, whether in the form of trellises, statues in stone or bronze, pools and fountains, plinths, seats, or spectacular plant containers, all these can be a very important part of successful garden design, often providing focal points and an instant maturity. We are most resourceful in our use of second-hand materials to give a mellow look from the word go. From a modest patio to a country garden, from a derelict site to a roof terrace, Anthony de Grey will design and build a garden that will constantly delight.

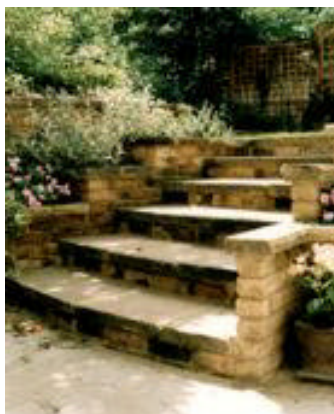

We do, of course, provide a maintenance service to keep your new or existing garden in a perfect condition. A visit and estimate is free, so contact us today and take your first step towards the garden you're always wanted.

Garden Maintenance

Whether you have a new garden or a well-established one, maintaining it regularly is vital, and this is where Anthony de Grey Gardens can help you out in today's busy world, where time is at such a premium.

All the expense of setting up a garden, roof terrace or even a small courtyard, not to mention the time invested in it over the years, goes to waste if it is not looked after properly and we have the qualified and trained staff to carry this out.

We will set up a regular maintenance programme with you, to take care of all those routine gardening chores, from mowing and weeding to pruning and planting, making sure that your home or office is never let down by the garden. We tailor this programme to include as much or as little of the work as you wish, leaving you free to concentrate on all those other priorities in life.

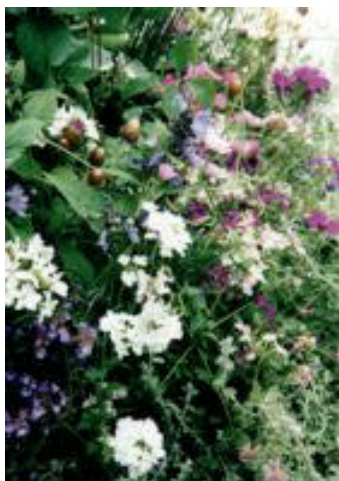

Contact Anthony de Grey Gardens today for a free maintenance estimate.

Planting Services

A garden without plants is like a room devoid of furniture, curtains and pictures, and a garden with unsuitable planting is not much better. We at Anthony de Grey Gardens have many years' practical experience of successful planting from a single window box to the largest of borders.

We understand well the various aspects of designing planting to suit any particular position, whether it be the subtleties of a scheme incorporating a more pastel palette of colours, an eye-catching spot needing bold colours to make an impact, or a less well structured position needing the strength of well-defined architectural shapes.

Our practical experience over the years enables us to offer a wide range of shrubs, perennials and climbers that is chosen for its effectiveness, but which includes many unusual and less common varieties. Coping with shade and the need for year-round interest are just two of the areas where we have developed a particular expertise. Of course, preparation of the soil is vital before any planting is undertaken, and this is one aspect to which we pay great attention in order to ensure the successful long-term development of any scheme.

Garden Design

Before

For more than 25 years, Anthony de Grey has been designing, building and restoring gardens, patios, terraces and roof gardens throughout London and within the M25 radius, as well as designing and overseeing several gardens abroad.

The garden plays a vital part in any home, be it a flat or a mansion, and equally in the work place, from restaurant to office, where thoughtful landscaping is an important element since a beautiful garden creates a sympathetic and successful working environment.

In view of this, we are always keen to stress the importance of structure, which provides the framework for sensitive or bold planting and which will continue to give pleasure when plants are no longer at their best.

Trelliswork, stone, pools, fountains, plinths, plant containers and sculpture are some of the most effective examples of this - not forgetting specimen architectural plants!

The successfully designed garden should reflect a subtle combination of creativity and inspiration while remaining eminently practical and, above all, meeting the owners needs.

After

We make sensitive use of secondhand materials where required. We also manufacture, supply and install our own range of Anthony de Grey Trellises and trellis-derived structures.

Maintenance is vital in any garden, so, once we have built the garden of your dreams, our maintenance service will help to keep it in top condition. We also are happy to look after existing gardens, plant out seasonally and provide plant displays for every occasion.

Our initial visit is free and charges for design work are scaled individually to each project, so make contact now to take the first step toward the garden you have always wanted.
